

## Soft Tissue Injury Prevention Tool

Tip Sheets Trade: Carpenters/Laborers	
Job Task: Formwork - [ General Tasks Dismantle steel shoring 1 frame at a time. Then stack 2 frames on top using forklift or crane to un-stack frames.	Dismantling & Removing Steel Shoring Common Tools  Hammer Tool Belt
<ul> <li>Potential Risk Factors         Risk Factors can lead to increased risk for Work Related             Musculoskeletal Disorders (WMSD's)         Working with Hands Overhead or Elbows             Above Shoulders      </li> <li>Moderate Risk when manually lowering shoring             components down to ground worker during             dismantling process.      </li> <li>Moderate Risk with frequent forward back         bending for extended periods when manually             lowering shoring components down to ground             worker during dismantling process.      </li> <li>Moderate Risk with frequent forward back         bending for extended periods when manually             lowering shoring components down to ground             worker during dismantling process.      </li> <li>Moderate Risk when frequently lifting end         frames, scaffold planks and extension frames         for extended periods of time, particularly when         lowering to ground worker, while standing on         second frame level.     </li> </ul>	<ul> <li>Possible Solutions         <ul> <li>Awkward Posture &amp; Lifting Solutions:</li> <li>Store all materials above ground on material handling carts or stacked pallets for easier lifting and handling. Move all components to specific work location using a forklift or pallet jacks.</li> <li>Evaluate using forklift or scissor lift to lower all shoring components to ground level as part of dismantling process.</li> <li>Rotate from ground level to above ground shoring dismantling tasks every 2-4 hours.</li> </ul> </li> <li>Potential Benefits         <ul> <li>Increases productivity.</li> <li>Increases blood flow and reduce muscle tension.</li> <li>Reduces strain on hand and arm muscles.</li> <li>Reduces awkward work postures and minimize lifting requirements.</li> </ul> </li> </ul>
<ul> <li>Feasibility <ul> <li>Engineer Control</li> <li>Administrative Control</li> <li>Work Practice Control</li> </ul> </li> <li>Estimated Cost of Intervention <ul> <li>None</li> </ul> </li> </ul>
